

Omnia Education Partnerships Ltd (OEP) Online Learning Innovator

A course for teachers with a passion to develop online learning solutions

Asynchronous and synchronous online course

Introducing tools and models for online learning

Focusing on engaging methods

Sharing good practice

Personal development initiative

Globally recognized Finnish diploma

Finland is a leading country in education, workforce development and digital innovation.

Finnish teachers take pride in being lifelong learners, actively developing their own teaching and innovation skills.

This course, based on the Finnish innovation know-how, gives practical tools and support in introducing innovative online digital learning approaches within one's organization. All participants build their own course during the training.

International participants will be exposed to new ways of thinking and doing, network, get support from other like-minded professionals and receive a practical toolbox to help their organizations in the process of change.

Successful participants will receive a globally recognized diploma from Omnia The Joint Authority of Education. Assessment is based on Finnish National Agency of Education standards.

Module 1 – Engaging online learning

- Introduction to innovative digital approaches
- Benchmarking innovative digital learning solutions

Module 2 – From Ideas into Innovations

- Identifying challenges in need of solutions
- Defining the challenges and working out action plans

Module 3 – Turning Innovations into Practices

- Enhancing the online learning process
- Scaling and spreading good practice

Module 4 – Displaying the Results

- Displaying results
- Creating learning communities

An ambassador of Finnish education and training

OEP is the international commercial arm of four Finnish organizations excelling in education and training. Our courses and programs provide tangible solutions with impact and are based on the best Finnish expertise and know how.
